

**Ons boek is klaar!  
Ons boek is daar!**

GRONDSLAG VIR DIE TOEKOMS

Toe ons 'n jaar of twee gelede deur Chris van Rensburg Publikasies genader is vir 'n koffietafelboek vir die SAISI Eeufeesjaar, was ek skepties, lugtig en somer net negatief.

Maar daar was 'n positiewe reaksie van ons lede, van die professie en die bedryf, en tussen ons en Chris en Bev Lawrence het die span die doelwit bereik.

Die boek is uiteindelik NIE 'n gewone koffietafelboek nie. Ek het destyds besluit dit moet MEER wees - dit moet werklik 'n gebruiksartikel wees en nie net mooi lyk nie. Dit gaan ook na Afrika toe en die res van die wêreld - ek meen dis dalk 'n eerste!

Dankie aan almal wat meegewerk het!  
Dawie

**Foundation for the future**  
Civil Engineering in South Africa

**At last it is a reality!  
Our book is ready!**

In my foreword I wrote:  
"To present 100 years of civil engineering spanning the SAICE Century with the appropriate reverence for the structures and its creators' pioneering spirit is indeed a challenge and a privilege. This book is essential reading for all decision-makers in both the public as well as the private sector, young people considering a career choice, civil engineering professionals, civil engineering students and the public at large, indeed young and old, anybody interested in South Africa's achievements, especially over the last 100 years.

It is inspiring and gives a sense of both pride and appreciation to look back on past innovations and achievements. It also stimulates the reader to contemplate what can be achieved when the modern civil engineering professionals apply their minds, their talents and their skills to the task of creating a better quality of life for all on our continent. They apply modern technology and utilize the pioneering spirit of our predecessors to resolve the challenges presented by

our wonderful diverse country and its equally diverse people and environment."

This is a comprehensive reference work with quotes from 100 presidents, an explanation about what infrastructure is and does. It talks about the wonderful diverse world of civil engineering. It tells the stories of four role models. It

communicates about sustainable development and last but not least, it has a section on careers and how to get into the civil engineering profession.

The book is the beginning of many things to come, possibly a CD-ROM, editions for learners at schools, outreach material, a companion for decision-makers, a brag book about South African achievements.

**CONTENTS**

<b>Acknowledgements</b>	ii	<b>Introduction</b>	xxiii
<b>Life began in Africa</b>	iv	<b>History and heritage</b>	3
<b>Foreword</b>	viii	Sustainable engineering is what we provide - for sustainable development	7
<b>Message from the SAICE Executive Director</b>	x	SAICE will persevere with Integrity, consistency, enthusiasm, dependability, trust and commitment launching into the new SAICE century with confidence and conviction	7
But what is infrastructure and what purpose does it serve?	x	The wise voices of the civil engineering leadership the role-models speak	7
What are these?	x	In this chapter we learn from and about our post	9
How well is the developing world providing its people with public works infrastructure?	xi	This section contains very brief extracts from presidential addresses that total more than half a million words. The extracts make worthwhile reading and are valuable in building personal capacity and philosophy from 1903 to 2003	9
The South African scene	xi	<b>The wonderful diverse world of civil Engineering</b>	39
What can public works infrastructure do for us?	xi	<b>Construction</b>	41
What are the criteria against which successful public infrastructure can be measured?	xii	Nelson Mandela bridge	47
What can be done?	xii	Lost City and Sun City	47
Who pays for infrastructure?	xiii	Brixton (Sentech) and Hillbrow towers	49
Who are the role players in providing public infrastructure to the community and civil society?	xiii	<b>Environmental engineering</b>	53
Let us look into what each group must or should be doing and some of the relevant processes	xiii	Rehabilitation of coal mines in KwaZulu-Natal	56
The ASCE Voter's Guide for Renewing America's Infrastructure, gives advice	xiii	Main Road 191 Groot Drakenstein	56
The engineering profession	xiv	Minimum requirements	56
What is the role of the South African Institution of Civil Engineering?	xiv	<b>Geotechnical engineering</b>	59
The main components of the decision-making process	xv	Huguenot tunnel	61
Research and development	xv	Trust Bank basement	63
Former SAICE Presidents Visser and Milford believe we need Innovation	xv	Engineering geology and Tony Brink	63
Decision-makers can contribute by supporting a well-developed research Initiative	xv	<b>Information technology</b>	65
Feasibility studies	xv	Allyson Lawless civil engineering software	67
Planning	xv	What was the background?	67
Design	xvii	Vodacom cell phone towers	71
Implementation and or construction	xvii	Flood forecasting and management	71
Managing the assets by appropriate operation and maintenance	xvii	<b>Railway and harbour engineering</b>	75
Decommissioning	xviii	The Dolos	77
Conclusion	xviii	Dedicated heavy haul export railway lines	79
What can our citizens do?	Xviii	Richards Bay coal line	79
<b>Message from the SAICE President 2004</b>	xx		

**CONTENTS**

Sishen-Saldanha iron ore line	79	Where do I study and what qualifications do I get?	133
Table Bay foreshore	81	What financial assistance can I get for my studies?	133
Structural engineering	83	Which organizations will assist me in my career?	133
Garden Route bridges	85	Are there courses of study to be taken when one is employed?	135
Southern African Large Telescopes	87	Are there special aptitudes required?	135
Carlton centre	87	What personality traits are desirable?	135
<b>Transportation engineering</b>	89	Does the work require any particular physical qualities?	135
Transportation planning	91	Salary and fringe benefits	135
Transportation engineering	91	What is an average starting salary?	135
Geometric design	91	Are there other financial benefits, e.g. bonus, pension scheme, medical aid, housing subsidy, car allowance, expense account?	135
Traffic engineering	93	How much leave can I expect?	135
Examples of transportation	93	Is there opportunity to work in other parts of the world?	135
Huguenot tunnel	93	Opportunities for the future	135
Johannesburg motorway system	95	What are the prospects for promotion?	135
Uncle Charlie's intersection	97	Are there ongoing developments in this occupation?	135
<b>Urban and rural engineering</b>	103	What is the demand for civil engineering professionals?	135
Richards Bay	105	What is the maximum salary one can reach?	135
Water to the people	108	Conditions of work	135
Infrastructure for mass housing	109	What are the hours of work?	135
<b>Water engineering</b>	111	Are there unpleasant tasks in the daily routine?	139
Lesotho Highlands Water Project	119	What aspects of the work are regarded as pleasant?	139
Hartbeespoort Dam	121	What are the prospects for working in various places?	139
Tugela-Vaal	121	Is there job security in civil engineering?	139
<b>Engineers are the Leonardo da Vinci's of the 21st century</b>	123	<b>Role model biographies</b>	140
Engineers are everywhere	127	Fariel Allie	140
Challenges	127	Trueman Goba	144
African engineers quo vadis?	131	Bazil Avron Kantey	150
Frequently asked questions about civil engineering	131	Allyson Lawless	152
Academic requirements, training and qualities needed	131	<b>Roll of Honour</b>	155
What general education is necessary?	131	<b>Sponsors</b>	158
Which school subjects are most important in preparation?	131		
Are good marks required in any subject?	131		
How do I know that I could become a successful civil engineering professional?	131		
What will the various members of the professional team do?	133		
The engineers	133		
The technologists	133		
The technicians	133		
What forms of specialization are there in this field	133		

**We believe it to be the first of its kind in the International World of Engineering**
